CONTENTS of all the PARTS.

LETTER I. From *Benjamin Franklin*, Esq; of *Philadelphia* to *Peter Collinson*, Esq; F. R. S. *London*. *page* 1.
— Observations on the *Leyden* Experiment, confirmed by further Experiments
LETTER II. From the same to the same *page* 10
— An Account of certain new electrical Phænomena; electrical Lightning; an electrical Kiss; an electrical Spider; a commodious Machine, *&c.*
LETTER III. From the same to the same *p.* 19
— Farther Experiments and Observations on Electricity. On the *Leyden* Phial; a magical Picture; a Wheel turning by Electricity; an electrical Jack; a self-moving Wheel; Paper perforated by electrical Fire, *&c.*
LETTER IV. Observations, *&c.* towards forming a new Hypothesis, for explaining the several Phænomena of Thunder-gusts *p.* 36.

ADDITIONAL PAPERS.

— Opinions and Conjectures concerning the Properties and Effects of the electrical Matter, arising from Experiments and Observations made in *Philadelphia* 1749 *p.* 51
— Additional Experiments concerning the *Leyden* Bottle *p.* 83
— Corrections and Additions to the preceding Papers *p.* 85
LETTER V. From Mr *Franklin* to Mr *Collinson* *p.* 89
— Commazants on Ship-board; Sea Compasses spoiled, or their Poles inverted by Lightning; Polarty given to Needles by Electricity, and the Needles turned blue thereby, and sometimes melted; as also Tinfoil; Gunpowder fired by electric Flame.
LETTER VI. From the same to the same *p.* 93
— Queries and Answers about Electrics and Non-electrics; the Effects of Air in electrical Experiments; Experiment towards discovering more of the Qualities of the electric Fluid
LETTER VII. From Mr *Kinnersly* at *Boston* to *B. Franklin*, Esq; at *Philadelphia*; what glass repells, rosins and sulphurs attract; the Conductor refuses to be electrified by rubbed Glass and Sulphur applied to it at the same time; the Phial charged by the sulphur Globe, and then discharged by the Glass one, and *vice versâ*, *&c.* *p.* 99
LETTER VIII. Mr *Franklin*'s Answer to Mr *Kinnersly* *p.* 102
LETTER IX. Mr *Franklin* to Mr *Kinnersly*. Experiments with a Glass and Brimstone Globe; a Quere *p.* 103

LETTER
